

Packaging designed with your participants in mind

Color Coded Packaging Boxes are color coded based on the type of medication, allowing for easy identification by participants. Everyday/Cycle meds are in blue and As Needed/PRN meds are in red.

SimplePacks Simplicity is further enhanced by bundling presorted medications by administration day and time in our SimplePacks.

Each SimplePack holds up to 6 prescriptions, easily identified by matching icons on the EasyRead label located on the outside of the box. SimplePacks are easily removed from the box, conveniently allowing participants to tear off only the packs they need.

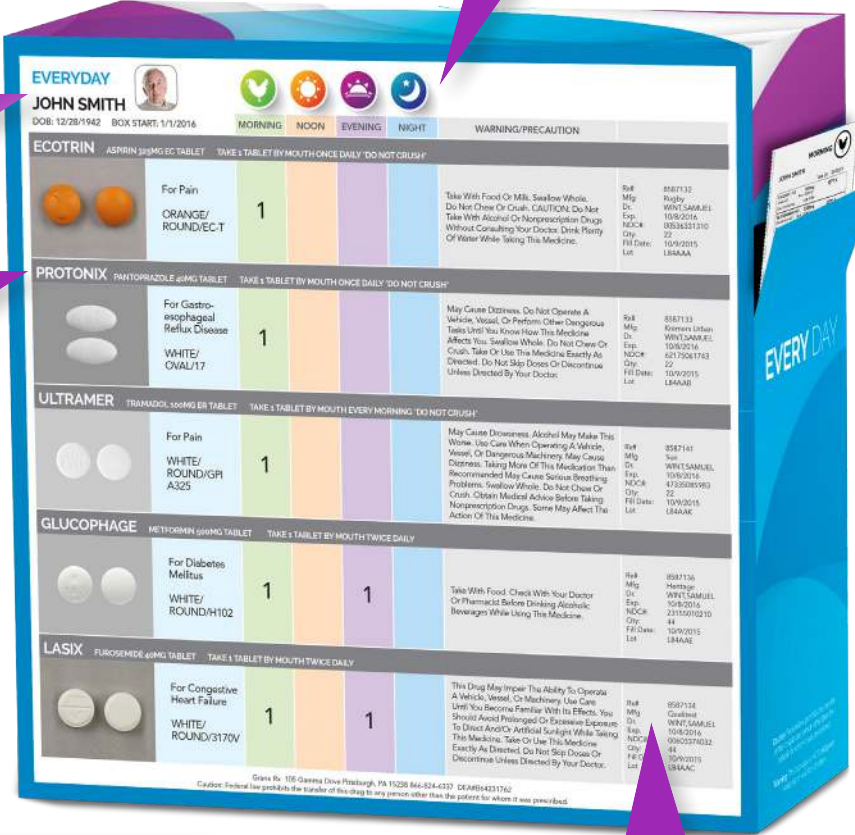

Medication Literacy for Every Participant Medication adherence improves when participants understand their medications and accompanying instructions. Grane Rx makes this easy by including its proprietary EasyRead label on the side of each box. Each EasyRead label is written with a 5th grade reading level in mind and is available in 22 languages.

Universal Medication Schedule with dosing schedule and EasyRead Icons that sync with SimplePacks

Participant information: photo, name, DOB, and start date

Medication information: Photo, reason, and description

EasyRead Pharmacy Calendar

In addition to the EasyRead label affixed to the box, Grane Rx also provides a separate, removable EasyRead Pharmacy Calendar. This calendar mirrors the information on the box and allows participants to keep a visual reminder on their fridge or with them when they're on the go.
